

## CANNABIS SALVE

4 3/4 Cups virgin olive oil

6 Tbsp virgin coconut oil

1 ½ cups dried cannabis leaf – 3 cups dried bud (stronger is better)

Pure cocoa butter or beeswax – enough to create salve consistency

Optional: Essential oil of lavender (or essential oil of your choice), DMSO, Arnica Oil, or other ingredients known to treat the area you would like to treat.

Heat olive and coconut oils in crockpot or large saucepan; add dried cannabis. Steep for a couple of hours, stirring occasionally. (IMPORTANT: Keep just below simmer point. Do NOT boil or simmer. If bubbles form, reduce heat!)

Allow mixture to cool and then strain with several layers of cheesecloth or an herb press.

Place in a clean container and slowly add beeswax or cocoa butter. (You may have to re-melt when using cocoa butter to find correct consistency.) Add essential oil as desired.

\* You can buy these ingredients and glass jars at S.O.A.P.
